PROFESSIONAL SUMMARY

Software Engineering graduate now pursuing a B.Sc. (Hons) in Data Science, combining two years of production backend/full-stack development experience with hands-on machine learning and NLP project work. Comfortable across the stack - from building Laravel/PHP web applications to training and deploying transformer-based models. Seeking a trainee or entry-level role in Data Science, Machine Learning, or AI.

ACADEMIC HISTORY

B.Sc. (Hons) in Data Science Sabaragamuwa University of Sri Lanka	2024 – 2028
BEng in Software Engineering IIC University of Technology (Java Institute)	2022 – 2025
Diploma in Information Technology ESOF Metro Campus	2021 – 2022
G.C.E. Advanced Level Examination	2022

WORK EXPERIENCE

Backend Developer | Jayawardena Enterprises (Pvt) Ltd 2023 - 2025

Laravel · PHP · MySQL · JavaScript

- Built and maintained backend services and database logic for business web applications using Laravel and MySQL.
- Collaborated with the team to deliver features end-to-end, from API design to deployment.

Full Stack Developer | Froze-it (Pvt) Ltd 2022 - 2023

Laravel · PHP · CSS · JavaScript

- Developed both front-end interfaces and back-end functionality for client web applications.
- Gained early experience across the full development lifecycle, from requirements to release.

PROJECTS

CareerCompass AI - Python, FastAPI, React, LangGraph, Tailwind CSS, NLP

- Developed a deterministic multi-agent career guidance platform with 6 specialist AI agents.

Explainable Depression Detection from Social Media Text - Python, DistilBERT, SHAP, React, FastAPI

- Built an NLP system achieving 95.5% accuracy for depression detection and deployed it as a full-stack React/FastAPI web app.

NLP-Driven GitHub Technology Trend Discovery Platform - Python, Scikit-learn, NLTK, Streamlit, GitHub REST API

- An NLP-powered data science system that mines and clusters 5,000+ GitHub repositories to identify emerging tech trends and visualize technology popularity through an interactive Streamlit dashboard.

FocusZen - AI-Assisted Full-Stack Student Productivity Platform - Python, Laravel, JavaScript

- Built a student productivity platform featuring study time tracking, task scheduling, and academic performance monitoring.

NEXLAB - Automated Priority-Based University Resource Management System - Laravel, PHP, Python, JavaScript

- Engineered a dynamic priority-scoring engine and hybrid scheduling algorithm to automate resource allocation and prevent scheduling overlaps.

Microsoft Stock Market Analysis - Python, Pandas, Probability Theory, Seaborn

- Executed statistical analysis on 40 years of stock data to model market risks and behavioral trends.

FineMate - Smart Traffic Fine Management System - PHP, Python, JavaScript, MySQL

- Designed an automated web platform for digital traffic fine processing and real-time administrative analytics.

CERTIFICATES

- Certificate Course in CCNAv7 - Cisco Networking Academy, 2022
- Google AI Essentials Specialization - Coursera, 2025
- AI in Data Analysis - Sololearn, 2025
- ML for Beginners - Sololearn, 2025

ACHIEVEMENTS

- CryptX 2.0, University of Sri Jayewardenepura - Top 15 Finalist
- Codemania V6.0, SLTC Research University - Top 15 Finalist (Team Deadlock)
- BITCODE v6.0, Rajarata University of Sri Lanka - Top 10 Finalist (Team Deadlock)\
- CodeRally 7.0, IIT University of Sri Lanka - Top 10 Finalist (Team Predictra)
- InspiHER (HackNova V4.0), SLTC Research University - Top 10 Finalist (Team Hacktronix)
- CIPHER 2.0, IIT University of Sri Lanka - Top 10 Finalist (Team Predictra)

TECHNICAL SKILLS

- Languages & Frameworks: Python, Java, PHP, JavaScript, Laravel, React, FastAPI, HTML, CSS, MySQL
- Data Science & ML: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch
- Tools & Analytics: Power BI, Git, GitHub, REST APIs, CCNAv7 Networking Fundamentals

VOLUNTEERING

- STEM Volunteer / Educator - STEMUP Educational Foundation
- Rotaract Club Volunteer - Rotaract Club of Sabaragamuwa University of Sri Lanka
