PROFESSIONAL SUMMARY

Software Engineering graduate currently pursuing a B.Sc. (Hons) in Data Science, with two years of professional backend and full-stack development experience and hands-on experience in machine learning and NLP. Skilled in developing Laravel/PHP applications and building and deploying transformer-based ML solutions. Seeking a trainee or entry-level opportunity in Data Science, Machine Learning, or AI.

ACADEMIC HISTORY

B.Sc. (Hons) in Data Science | Sabaragamuwa University of Sri Lanka *2024 - 2028*
CGPA: 3.60

BEng in Software Engineering | IIC University of Technology (Java Institute) *2022 - 2025*
Second Class Upper Division

Diploma in Information Technology | ESOFT Metro Campus *2021 - 2022*

G.C.E. Advanced Level Examination | Buddhist Girls' College - Kirimatiyana *2022*

WORK EXPERIENCE

Backend Developer | Jayawardena Enterprises (Pvt) Ltd *2023 - 2025*
Laravel · PHP · MySQL · JavaScript

- Built and maintained backend services and database logic for business web applications using Laravel and MySQL.
- Collaborated with the team to deliver features end-to-end, from API design to deployment.

Full Stack Developer | Froze-it (Pvt) Ltd *2022 - 2023*
Laravel · PHP · CSS · JavaScript

- Developed both front-end interfaces and back-end functionality for client web applications.
- Gained early experience across the full development lifecycle, from requirements to release.

PROJECTS

Explainable Depression Detection from social media Text - *Python, DistilBERT, SHAP, React, FastAPI*

- Fine-tuned a DistilBERT NLP model to analyze social media text, achieving 95.5% classification accuracy for early depression detection. Integrated SHAP to provide explainable model insights and deployed the full-stack system as an interactive React and FastAPI application.

NLP-Driven GitHub Technology Trend Discovery Platform - *Python, Scikit-learn, NLTK, Streamlit, GitHub REST API*

- Mined 5,000+ open-source repositories using the GitHub REST API and applied TF-IDF with K-Means clustering to discover emerging tech trends. Built an interactive Streamlit dashboard to visualize technology popularity based on repository stars, keywords, and similarity metrics.

CareerCompass AI - *Python, FastAPI, React, LangGraph, Tailwind CSS, NLP*

- Architected a deterministic multi-agent system with 6 specialized AI agents orchestrated via LangGraph to deliver personalized career roadmaps. Developed a high-performance React and FastAPI web interface that streams real-time AI reasoning and actionable skill-gap analyses.

FocusZen - AI-Assisted Full-Stack Student Productivity Platform - *Python, Laravel, JavaScript*

- Architected a full-stack productivity app with time tracking, task scheduling, and gamified achievement systems using Laravel and MySQL. Implemented Python Flask microservices to serve behavior-based recommendations for personalized study content and optimal sleep schedules.

Flood Risk Assessment & Vulnerability Mapping Dashboard - *Power BI, Data Analysis, Geospatial Visualization*

- Built an interactive dashboard analyzing flood risk across 25 Sri Lankan districts using 25,000 location records. Evaluated environmental and hydrological factors such as elevation, rainfall, drainage, and river proximity to identify vulnerable areas and major risk drivers.

AWS - Based Customer Churn Prediction & Analytics Solution - *AWS S3, Lambda, CloudWatch, Glue, Athena, XGBoost,*

- Built an end-to-end AWS-based churn analytics pipeline with event-driven data validation, serverless SQL analytics, and ML models for telecom customer churn prediction; achieved 80.21% recall and 0.8468 ROC-AUC using Focal Loss XGBoost, with actionable retention insights from Athena analysis.

Online Course Analytics Dashboard - *Python, Streamlit, Selenium, Pandas, Matplotlib*

- Scraped and preprocessed nearly 10,000 course records from Udemy and Coursera using Selenium and Pandas to unify cross-platform metrics. Built an interactive Streamlit analytics dashboard featuring real-time search filters, platform comparisons, and price-to-duration visualizations.

CERTIFICATIONS

- Certificate Course in CCNAv7 - Cisco Networking Academy, 2022
- Google AI Essentials Specialization - Coursera, 2025
- AI in Data Analysis - Sololearn, 2025
- ML for Beginners - Sololearn, 2025

ACHIEVEMENTS

- CryptX 2.0, University of Sri Jayewardenepura - Top 15 Finalist
- Codemania V6.0, SLTC Research University - Top 15 Finalist (Team Deadlock)
- BITCODE v6.0, Rajarata University of Sri Lanka - Top 10 Finalist (Team Deadlock)
- CodeRally 7.0, IIT University of Sri Lanka - Top 10 Finalist (Team Predictra)
- InspiHER (HackNova V4.0), SLTC Research University - Top 10 Finalist (Team Hacktronix)
- CIPHER 2.0, IIT University of Sri Lanka - Top 10 Finalist (Team Predictra)

TECHNICAL SKILLS

- Languages & Frameworks: Python, Java, PHP, SQL, JavaScript, Laravel, React, FastAPI, HTML, CSS, MySQL
- Data Science & ML: NumPy, Pandas, Scikit-learn, TensorFlow, PyTorch, Matplotlib, Seaborn
- Tools & Analytics: Power BI, Git, GitHub, REST APIs, CCNAv7 Networking Fundamentals, AWS

SOFT SKILLS & LANGUAGES

- Soft Skills: Team Management, Problem-Solving, Creativity, Teamwork, Leadership, Adaptability, Multitasking
- Spoken Languages: English (Intermediate), Sinhala (Native/Bilingual)

VOLUNTEERING

STEM Volunteer / Educator - STEMUP Educational Foundation

- Supported STEM education activities and assisted in organizing learning sessions for students, contributing to community-based technology and education initiatives.

Rotaract Club Volunteer - Rotaract Club of Sabaragamuwa University of Sri Lanka

- Served as an Event Coordinator, responsible for planning, organizing, and coordinating club events and community service activities.

IEEE Volunteer - IEEE Student Branch, Sabaragamuwa University of Sri Lanka

- Served as a member of the Secretary Team, supporting the coordination, documentation, and execution of IEEE activities and events.
